

Company Profile

Bricks & Bits is a leading provider of energy efficiency solutions and is involved in energy trade and brokerage. Deployed on customers' operating systems, Bricks & Bits solutions dramatically reduce energy consumption and decrease organizations' overall operational expenses. Bricks & Bits solutions are implemented by multinational companies, organizations, institutions, municipalities, retail chains, industries and logistics suppliers. Bricks & Bits stands by its "risk-free" commitment to customers that results in significant and measurable cost-savings.

Bricks & Bits solutions significantly reduce energy consumption by 10-30%, resulting in ROI, which in most cases, does not exceed two years. Bricks & Bits energy-saving solutions improve operational efficiency in the following systems: lighting, motors, cooling, air conditioning, ventilation, heating, remote metering, and electricity management. We stay focused on the latest energy-saving developments and trends. This gives us the capacity to offer our customers next-generation solutions from leading technology providers.

Bricks & Bits comprehensive project management includes a tailored solution consisting of analysis & audit, optional pilot installation to prove the cost-saving potential subsequent to deployment, installation, commissioning and handover, followed by fine-tuning, maintenance and support.

Bricks & Bits is a European-based venture with offices in Amsterdam, Warsaw, Budapest, and Prague. Founded in 2002, the company employs skilled engineering professionals supported by a reliable management team. Bricks & Bits takes pride in a diverse customer base that includes Carrefour, Tesco, Auchan, IKEA, Elea, Leroy Merlin, Geant, H&M, Coca-Cola, Danone, Nestlé, McDonald's, British American Tobacco, Hilton Hotels, City Bank, Skanska, DHL, FM Logistics, GM-Opel, Suzuki, Toyota, Michelin and a host of global companies.
